SCIENCE

Month	Chapter /Unit	Practical / Experiment / Activities	Learning objectives / outcome
APRIL(23)	Ch-1 Chemical reactions and equations (Chemistry)	Practical – To perform various chemical reactions and classify them into types.	Students will be able to identify the type of reaction around them. Classify it on the basis of its type. Students will be able to balance the chemical reactions.
	Ch-6 Life processes (Biology)	Practical - 1. Prepare a temporary mount of leaf peel to show stomata. 2. To show that Carbon di oxide is released during respiration.	Students will understand the working of various organ systems and the fundamentals of life.
	Ch- 10 Reflection of light. (Physics)	Practical- - To determine the focal length of concave mirror	students will understand the reflection of light and the concept of ray diagram for plain and spherical mirror.
MAY(27)	Ch-1 Acids, bases and salts (Chemistry)	Practical- 1. To find the ph of certain samples. 2. To study the properties of acids and bases.	Students will be able to classify substance as acids, bases and salts. Also they will understand the preparation and properties of certain salts.
	Ch-6 Life processes (Biology) contd.....	Practical- 1. Prepare a temporary mount of leaf peel to show stomata. 2. To show that Carbon di oxide is released during respiration	Students will understand the working of various organ systems and the fundamentals of life.
	ch- 10 refraction of light (Physics)	1. To determine the focal length of concave lens.	Students will understand the refraction of light and the concept of ray diagram for spherical lenses.
JUNE	SUMMER VACATIONS		

JULY(26)	Ch-3 Metals and nonmetals (Chemistry)	Practical- 1. To Study the reactivity of various metals.	Students will learn to differentiate between metals and nonmetals along with the process of preparation of certain important compounds.
	Ch-7 Control and coordination (Biology)	Activity – Draw the well labeled diagram of human brain.	Student will be able to understand the structure and function of brain along with hormonal coordination.
	Ch 11-human eye and the colourful world	Practical- Tracing the path of light (refraction through glass slab).	students will be able to understand the process of vision /structure of human eye and its defect like myopia and hypermeteropia.
AUGUST(25)	Ch-3 Metals and nonmetals contd.... (Chemistry)	Practical- 1. To Study the reactivity of various metals.	Students will learn to differentiate between metal and nonmetal along with the process of preparation of certain important compounds.
	Ch-8 How do organisms reproduce (biology)	Practical- 1. To study binary fission in amoeba and budding in yeast.	Students will be able to understand the process of reproduction for continuity of life.
	Ch-12 Electricity (Phy)	Practical-Study the dependence of V and I and R (Ohm's law)	Student will understand about the current and instrument which verify ohm's law.
SEPTEMBER(25)	Ch-4 Carbon Compounds (Chemistry)	Practical- 1. To study the properties of ethanoic acid.	Students will get the fundamental knowledge of unique behaviour of carbon, Preparation and properties of some Hydrocarbons.
	Ch-09 Heredity and evolution (Biology)	Practical- 1. To identify different parts of embryo of adicot seed.	Students will understand gene and chromosome as the hereditary unit and its transmission in offspring along with evolutionary theories.
	Ch-12 Electricity (Phy) contd.....	Practical-Study the dependence of V and I and R (Ohm's law)	Student will understand about the current and instrument which verify ohm's law.
OCTOBER(22)	Ch-4 Carbon Compounds contd..... (Chemistry)	Practical- 1. To study the properties of ethanoic acid.	Students will get the fundamental knowledge of unique behaviour of carbon, Preparation and properties of some Hydrocarbons.
	Ch-15 Our environment (Biology)	Act- Biodegradable and non biodegradable wastes	Students will understand the basic cause behind various environmental issues and the measures to combat the same.
	Ch-13 magnetic effect of electric current (Physics)	Practical-To determine the force acting on current carrying conductor in magnetic field.	Student will be able to understand the left hand thumb rule.
